Petition to Stop the Downtown Central Bus Station

We, the undersigned citizens of Greater Rochester, do hereby petition the Rochester Genesee Regional Transportation Authority (RGRTA), the City of Rochester, the County of Monroe, and all other local, state, and federal officials to stop all efforts related to the construction of the underground bus terminal located on Main Street at Clinton Avenue, known as Rochester Central Station, described at a public meeting held on November 25, 2003. We believe this specific design and location is inappropriate, inconsistent with short and long range downtown development objectives, damaging to historic buildings, too costly and deficient in many details including its impact on downtown traffic patterns, bus patron convenience, public health, and air quality.

We also believe that there are several more desirable alternatives to this proposal which have had inadequate or no consideration, and that public participation has been inadequate.

Given a proposed investment approaching $60-million, it is only prudent that this project be halted until all of these issues have been adequately addressed and an optimal solution arrived at which is agreeable to all.
